

Membership Agreement Ocean Hyway Cluster

1. About the Cluster

Ocean Hyway Cluster (OHC) aims to be the leading cluster to develop hydrogen value chains and enable the use of hydrogen in maritime transport. With our extensive national and international network, we drive green growth, innovation and collaboration.

All companies who see themselves as part of the hydrogen value chain can become members of OHC. Members are expected to contribute with knowledge and competence to develop the cluster.

2. Agreement period and termination of membership

The agreement between the parties is binding from the enrolment date of a new member. The membership will run until it is terminated. Such termination must be made in writing and will take effect from the following year. If memberships are terminated during a billed period, the invoiced amount will not be refunded.

3. Financial matters

The member is to pay an annual fee for services from OHC. The membership rate is determined by the steering committee in OHC, current rates can be found in Appendix 1.

To the extent that the member requires services beyond the scope of this agreement, a separate agreement should be prepared to cover these services.

4. Confidentiality and privacy

Information shared in the cluster will be treated with discretion and will not be distributed without the consent of the member.

In accordance with the privacy policy, the cluster members agree that OHC may store necessary personal data relating to the cluster members and their contact persons under this Agreement. [More information can be found here.](#)

5. Contract signing

The agreement shall be signed electronically through the online form, [available on this website.](#)
